**Purpose of Inspection:**  
This was a routine inspection.

### Inspection Summary:

The site is not undergoing great expansion except a waste dump that is increasing in size and the permit needs to be reviewed to see if the permit contemplated this. The mine itself will be undergoing engineering studies to determining the best mining methods.

### Conclusions and Recommendations:

Overall, this is a clean operation where the operator is trying diligently to comply with regulatory requirements and, as the area is being mined, to be aware of the eventual need to reclaim the site. There was comments on the need to spray whitetop, a noxious weed on site. This was not discussed.
